Town of Bergen Highway Department Building

Gates Street, Bergen, New York

PROGRAM: 11,625 SF free standing pre-engineered steel framed metal highway department building.

COST: \$1,294,000

This project was a new highway department building for the Town of Bergen, New York. It included seven truck storage bays, two truck maintenance bays and a 1,850 square foot office function that included toilet and bathing facilities, staff lounge and a supervisor's office. The exterior elevations were designed to be sensitive to the surrounding residential neighborhood as well as provide low maintenance and vandal resistance.
