

UNITY HEALTH SYSTEM

Geriatrics Clinic, Rochester, New York

PROGRAM: 4,625 square foot outpatient doctors office.

COST: \$250,000

This project consists of creating a new outpatient doctors office for an existing geriatrics practice. We worked with Unity to develop a space that met their current needs. This included 7 exam rooms, 5 doctors offices, a triage room, a nurse station and a business office, along with other support space for the practice. The space was designed to meet the New York State Department of Health's Article 28 requirements. SIMBARI DESIGN worked with the Unity Health System to program and design the space as well as to prepare the Certificate of Need Applications.
