## CHATFIELD ENGINEERING, P.C.

2800 Dewey Avenue, Rochester, New York

### BEFORE:

#### PROGRAM:

This project relocated the offices of Chatfield Engineers, P.C. from their former location on English Road to this new location on 2800 Dewey Avenue. The 1960's 5,700 square foot strip plaza was transformed into a brighter, more pleasant stucco and stone faced. The previous brick façade was telling of the building's age and contrasted with the recent surrounding development. The new renovations however, enhance the streetscape and serve as an example of urban renewal. Added landscaping creates some green space & enhances curb appeal while reducing the area of the asphalt parking lot and impervious surface. The project has been awarded the Greece Chamber of Commerce 2009 Civic awards in the Rehabilitated Building Category.
