

SIMBARI DESIGN

Architecture, PLLC

IDE IMAGING PARTNER'S, INC. Park Ridge Hospital—MRI, Rochester, New York

PROGRAM: New 1.5T MRI suite expansion.

COST: \$600,000

DESCRIPTION: This project consisted of a tenant expansion to create a new 1.5T MRI suite. The alterations included the MRI scan room, MRI equipment room, Control Room, Patient Holding and Dressing Areas, and Staff Offices. Particular consideration was given to the acoustical design of the space because of the high noise level associated with MRI's and the spaces location in a professional office building with adjacent tenant spaces. Another key element of the design was to create a soothing and relaxing atmosphere for patients. This was accomplished through the use of a wall mural and high quality materials including cherry and Toli faux stone flooring.
